AMENDMENT & RESPONSE UNDER 37 C.F.R. § 1.116 - EXPEDITED PROCEDURE

Serial Number: 08/904,056

Filing Date: July 31, 1997

Title: AUDIO AND VIDEO CONTROLS ON A POINTING DEVICE FOR A COMPUTER

8. (Three Times Amended) A computerized system comprising:
a computer having at least a processor and a memory;
a multimedia device operatively coupled to the computer;
a pointing device having at least one control to control only the multimedia device such that actuation of a control causes the computer to change a functionality of the multimedia device associated with the control,

wherein the pointing device is operatively coupled to a corresponding port of the computer through which all communication between the pointing device and the computer occurs[and], wherein the at least one control to control only the multimedia device is operable without regard to orientation of the pointing device, and wherein the pointing device further includes a second control operative to control a second multimedia device through the computer.

12. (Three Times Amended) A pointing device for a computer operatively coupled to a multimedia device, comprising:

a housing;
at least one mouse button disposed within the housing;
a component disposed within the housing to signal directional movement to the computer; [and,]

at least one control disposed within the housing to control only the multimedia device through the computer; and

a second control disposed within the housing to control a second multimedia device through the computer.

wherein the at least one control to control only the multimedia device is operable without regard to orientation of the pointing device.

16. (Three Times Amended) A pointing device for a computer comprising:

a first control coupled to the device, the first control associated with operating the computer;

a second control coupled to the device, the second control associated exclusively with

operating a multimedia device through the computer, wherein the multimedia device is operatively coupled to the computer; and

a third control coupled to the device operative to control a second multimedia device through the computer, wherein the second multimedia device is operatively coupled to the computer, and

wherein the second control of the pointing device is operable without regard to orientation of the pointing device.

Please add the following new claims 19-22:

19. (New) A mouse device for a computer operatively coupled to a multimedia device, comprising:
- a housing;
 - a mouse button within the housing to control an operation on the computer;
 - a rolling device within the housing that signals directional movement of the mouse device to the computer; and
 - at least one control device disposed within the housing to control only the multimedia device through the computer,
- wherein the at least one control device is operable without regard to orientation of the pointing device.
20. (New) The mouse device of claim 19, wherein the rolling device is a sensor ball.
21. (New) A pointing device for a computer comprising:
- a computer control coupled to the pointing device, the computer control associated with operating the computer; and
 - a volume control coupled to the pointing device, the volume control associated exclusively with operating a volume of a multimedia device through the computer,
- wherein the multimedia device is operatively coupled to the computer, and
